Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: In the proposed amendment to claim 3, the word "construct" is mistakenly deleted from the first line such that the claim is directed to "a method of producing a targeting", which raises a new ground for objection, or rejection of the claim under 35 U.S.C. §112, second paragraph.

Continuation of 5. does NOT place the application in condition for allowance because: The proposed amendments to not fully address the rejection under 35 U.S.C. §112, first paragraph, of claims 5, 8, 9, 10, 11 and 20-25 as lacking enablement for the full scope of the claimed subject matter. In the remarks that accompany the amendments, Applicant asserts that because the mice and cells of the claims are limited to comprising a homozygous disruption of the stefin homolog gene comprising SEQ ID NO: 1 and exhibiting increased activity or a neurophsychological disorder, the claims are fully enabled by the specification (page 7, fourth full paragraph). However, the previous Office Actions clearly indicate that the specification is enabling only for "a homozygous KNOCKOUT mouse comprising a disruption in the stefin homolog gene comprising the sequences set forth as SEQ ID NO: 1 and exhibiting phenotypic features such as HYPERACTIVITY, DECREASED PROPENSITY TO DESPAIR, SCHIZOPHRENIC BEHAVIOUR AND DECREASED PREPULSE INHIBITION as compared to wild type mice" (Office Action mailed 19 June 2002, paragraph bridging pages 3-4, emphasis added; see also the Office Action mailed 14 January 2003, page 3). In other words, the disruption of the stefin homolog gene must result in loss of expression. In contrast, the proposed claims 5, 8, 9, 10, 11 and 20-25 still encompass a transgenic mouse and cells comprising any disruption (i.e., insertion, deletion or substitution in any portion of the gene; 19 June Office Action, page 5, first full paragraph) and a transgenic mouse that exhibits any neuropsychological disorder. Thus, had the proposed amendments been entered, the scope of claims 5, 8, 9, 10, 11 and 20-25 would still encompass subject matter indicated in previous Office Actions to lack enablement.
